

ErgoJust Cart

A mobile workstation, *ergo* adjustable to you

Natus recognizes one of the most crucial parts of delivering consistent patient care: you! The ErgoJust mobile cart is ergonomically designed to maximize your comfort allowing you to focus on your patients. At the point of care, the ErgoJust provides effortless access to Natus EEG software, devices, and accessories. Move the cart to any hospital room for a completely portable, small footprint, video EEG monitoring station. Featuring sit-to-stand height adjustability that suits your size and preferences, the ErgoJust cart is the ultimate portable station for Natus' advanced EEG monitoring offerings.

Product Features:

- Sit-to-stand height adjustment
- Ergonomic design for maximum comfort
- Point of care access to clinical data and accessories
- Easy maneuvering in many hospital environments
- Lockable and directional caster set for smooth mobility, reliability and safety
